PRESS RELEASE

Update on water supply in villages:

The operational status of Witpoort water scheme has been restored. During the past week, nine villages of which four(4) were seriously affected (kgobagodimo 1 and 2, Segale and Botsalanong) under the scheme, experienced disruption of water supply due to a blockage by tree roots in the water pipes. The Municipality's maintenance team worked around the clock to resolve the matter to restore the supply of water.

Currently there are no interruptions encountered on the system and we urge communities to use water sparingly as the drought season affects our borehole water source.

In case of emergency relating to water supply services call: 082 770 0085
