## **MUNICIPAL CAPACITY BUILDING HANDOVER PROGRAMME**

The Lephalale Local Municipality is the recipient of the Municipal Capacity Building programme, a programme facilitated by National Building Initiative (TAMVEV)) and Exxaro to capacitate the municipality on issues of service delivery such as water, sanitation, public works, electricity and finance.

The programme aims at ensuring the long-term success of Exxaro's Strategy, and the delivery of social and labour plan initiatives, and broader delivery issues. It demonstrates Exxaro's commitment to delivering on its purpose of 'powering better lives' in areas where its operations are located.

In his opening address the Mayor of Lephalale Local Municipality, Cllr Aaron Mokgetle said that he is pleased with the programme as it assisted the municipality in addressing issues of water loss and in achieving a healthy financial status.

Deputy Minister of Water and Sanitation, David Mahlobo, commended Exxaro saying that the work they are doing in helping municipality in building institutions and local communities goes without notice.

The Programme was implemented in 3 phases, first phase kicked off in December 2020 in the Waterberg District with the establishment of operating structures, mentoring relationships, and infrastructure project identification, for subject of the program support.
