LEPHALALE MUNICIPALITY

APPOINTMENT OF A SUITABLE SERVICE PROVIDER FOR THE REPAIR OF 50X 30 M³ SKIP BINS

Introduction

The specifications for the repairs of the bins are premised by section 24 of the Constitution of the Republic of South Africa that guarantees the right to the environment that is not harmful to health or well-being, and the right to have the environment protected for present and future generations. This protection is to be achieved through reasonable measures that prevent pollution, promote conservation and secure ecologically sustainable development alongside economic and social development.

Waste storage plays a significant role in the aesthetic appeal of the town, and such subscribe and conform to the prescripts and the relevant laws governing environmental management in the Republic of South Africa. Unsound management of the generated general waste is a public and environmental health nuisance or hazards especially to those in the vicinity of the generated waste. The generated waste undergoes both aerobic and anaerobic decomposition and, in the process, beget maggots producing larvae and Musca Domisticus housefly. The predominant waste in the generated waste stream is organic waste fractions resulting in the proliferation of microbes that are associated with the vector- borne diseases.

Number of the bins are derelict, and no longer appropriate for storage of waste. The derelict bins have negative ramifications on the ambiance of the town due to the fractions of waste escaping from the damaged bins. The Waste Pickers and removers exert pressure to empty the bins into the Rear End Loader Compactor truck. Their Health and Safety as prescribes in the occupational health and safety hierarchy of the controls is compromised as they empty the bins into the compactor trucks for conveyance into the sanitary landfill site, and that is tantamount to contravention of the

Waste Storage Landscape

30 cubic meter steel orange bins are mainly used for temporary deposition or storage of the generated general non-hazardous waste. The bins are serviced by the Roll-on Roll-off truck compatible with the bins. Total of 90 orange steel bins are distributed in 33 villages. The bins are used by the communities to temporarily store generated general household waste. The bins were procured somewhere between 2011 and 2025. The mobility of the bins is enhanced with wheels to facilitate ease of collection to the Roll-on Roll-off truck for collection

Services to be rendered

- * Installation of steel round bars and 200 x 200 mm 4 plates on 25 bins
- * Supply and install 200 x 200mm 4 wheels on 5 bins
- * Supply and install 150 x 150 mm side plates on 20 bins

Bin Collection and Delivery

Bins must be collected at the enclosed designated areas for temporary general non-hazardous waste storage in villages to the appropriate workshop of the appointed service provider meeting the requirements. It is the responsibility of the appointed service provider to consign the bins back to the respective locations immediately after the repairs. The consignment can only be undertaken immediately after the inspection of the completed bins and certification by the responsible municipal official.
