UPDATE: SEFITLHOGO ACCESS ROAD PROJECT

The Sefitlhogo Access Road project holds great importance for the municipality, with the goal of:

Upgrading road infrastructure: Boost the quality and safety of roads in the Sefitlhogo region.

Improving community accessibility: Upgrade roads for locals, facilitating access to services, educational institutions, and job opportunities.

Highlighting municipal initiatives: This key project illustrates the municipality's dedication to enhancing roadways and elevating the living standards for surrounding communities.

The project encompasses a detailed range of tasks that includes:

Road building and improvement: Extensive earthmoving, blasting of solid rock, layer applications, and pavement with hot-mix asphalt.

Drainage and erosion management: Building concrete v-drains, edge beams, culverts, stone pitching, and installing gabions.

Safety features for roads: Setting up kerbs, speed bumps, traffic signs, and pavement markings.

The advancement of the project is impressive, with 91.71% of particular tasks completed, showcasing substantial progress in various elements of the project. With a 40% overall project completion, indicating that the project is progressing according to schedule to meet its deadline.

Regarding employment generation and economic advantages, the project has generated job prospects for community members and business ventures, bolstering the local economy.

The initiative, scheduled for completion on 29 August 2025, aims to enhance access to education, services, and economic opportunities.
