

24 JUNE 2025

WATER PROJECT HANDOVER

In line with the Municipality's initiative to tackle water issues in the villages, Lephalale Local Municipality's Mayor, Cllr Aaron Mokgetle, accompanied by ESKOM-ROTEK Industries representatives and Municipal councillors, on 24 June 2025, introduced a water project to the community of Motlhasedi Village [Morula Sun].

The introduction of the water project represents a crucial achievement in tackling water issues in the villages. This advancement will help enhance and ensure adequate access to clean water while alleviating the challenges of water scarcity and bettering overall living standards.

In his initial speech, the Mayor emphasized that the effective execution and upkeep of the water project are vital for its long-lasting sustainability and influence within the municipality, which is focused on tackling water issues through the implementation of the Seleka Regional Water Scheme.

Mr. Taelo Mokoena from the local traditional authority, conveyed appreciation for the project transfer and highlighted the community's duty to sustain the project by promoting its efficient use and durability, while guarding against vandalism and protecting communal assets from harm or ruin.
