SPECIFICATION

1. PURPOSE AND SCOPE

The purpose of this specification is to appoint a suitably qualified and experienced service provider for the supply, delivery and installation of precast concrete palisade fencing at the following municipal facilities:

1. Multipurpose (Thusong) Centre;
2. Grootegeluk Landfill Site; and
3. Onverwacht Cemetery.

The works shall include the supply, transportation, offloading, handling and installation of precast concrete main posts, horizontal crossbars, vertical concrete pales, bolts, nuts and all associated fittings. The contractor shall also provide the concrete required for fixing and securing the posts in the ground, including excavation, placing, compacting and finishing of concrete foundations.

The contractor shall allow for all labour, supervision, tools, plant, equipment, transport, materials, fasteners and incidentals required to complete the fencing installation in accordance with this specification and the instructions of the Municipal Representative.

The fencing shall be installed to provide a durable physical barrier, improve site security, control access and protect municipal property. All installed components shall be properly aligned, securely fastened, stable and free from visible defects.

The quantities indicated in the Bills of Quantities (BOQ) are provisional for pricing purposes and shall be verified on site before installation. No additional quantities or work outside the approved scope shall be undertaken without written authorisation from the Municipality.

2. SITE LOCATIONS AND SCHEDULE OF WORKS

2.1 Multipurpose (Thusong) Centre

The contractor shall supply and install precast concrete palisade fencing at the Multipurpose (Thusong) Centre using the quantities and component dimensions indicated in the BOQ.

The main posts shall be approximately 3.0 m long, and the vertical concrete pales shall be approximately 2.4 m high. The contractor shall ensure that the main posts, crossbars and pales are compatible and form a complete, stable fencing system.

2.2 Grootegeluk Landfill Site

The contractor shall supply and install precast concrete palisade fencing at Grootegeluk Landfill Site. The main posts shall be approximately 2.4 m long, and the vertical concrete pales shall be approximately 1.8 m high.

The contractor shall verify the required post spacing, crossbar configuration and ground conditions before installation. The fencing shall be securely anchored to withstand normal site use and environmental exposure.

2.3 Onverwacht Cemetery

The contractor shall supply and install precast concrete palisade fencing at Onverwacht Cemetery. The main posts shall be approximately 3.0 m long, and the vertical concrete pales shall be approximately 2.4 m high.

The installation shall be undertaken with due care to avoid damage to existing cemetery structures, graves, walkways, landscaping, access routes and other municipal infrastructure.

2.4 Transportation and site distances

For quotation purposes, the following indicative distances shall be considered:

Route	Indicative distance
Onverwacht Cemetery to Grootegeluk Landfill Site	Approximately 4 km
Onverwacht Cemetery to Multipurpose (Thusong) Centre	Approximately 70 km
Onverwacht Cemetery	Starting/reference location

The contractor shall verify the delivery routes and site access conditions before submitting the quotation. The quoted rates shall include all transportation, loading, offloading, handling and delivery costs to the respective sites. No separate transport

claim shall be payable.

3. TECHNICAL REQUIREMENTS

3.1 General requirements

All precast concrete palisade fencing components shall be new, fit for purpose, manufactured to consistent dimensions and suitable for permanent outdoor installation.

The contractor shall ensure that the complete fencing system is compatible in terms of post dimensions, crossbar lengths, pale dimensions, fixing-hole positions and fastening arrangements.

All components shall be free from major cracks, honeycombing, exposed reinforcement, excessive chipping, distortion or other defects that may compromise their strength, durability, appearance or serviceability.

The contractor shall submit product information, component dimensions, installation details and, where requested, evidence of the manufacturer's quality-control procedures for approval before installation.

3.2 Precast concrete main posts

The main posts shall be manufactured from durable, adequately reinforced precast concrete suitable for supporting the concrete palisade panels and resisting the loads expected during normal service.

The posts shall:

- Be manufactured to the lengths specified for each site.
- Have adequate strength, reinforcement and cross-sectional dimensions for their intended application.
- Incorporate suitable slots, holes or fixing arrangements for the crossbars and pales.
- Be free from structural cracks, significant surface defects and exposed reinforcement.
- Be installed vertically, securely embedded in concrete foundations and properly aligned.
- Be spaced according to the approved fencing system and verified site measurements.

The nominal post lengths are as follows:

- Multipurpose (Thusong) Centre: 3.0 m posts.
- Grootegeluk Landfill Site: 2.4 m posts.
- Onverwacht Cemetery: 3.0 m posts.

DOWNLOADABLE

The contractor shall confirm that the post length provides adequate embedment and the required finished fence height. The post length shall not be treated as the finished exposed fence height.

3.3 Precast concrete horizontal crossbars

The horizontal crossbars shall be compatible with the specified posts and vertical pales and shall provide secure horizontal support to the fencing system.

The crossbars shall:

- Be manufactured from sound, durable precast concrete.
- Have suitable dimensions and fixing arrangements for the proposed fence height.
- Be installed level and in accordance with the manufacturer's approved configuration.
- Be securely connected to the main posts using suitable bolts, nuts and associated fittings.
- Be properly supported without excessive gaps, movement or unsupported ends.

3.4 Precast concrete vertical pales

The vertical pales shall be manufactured from durable precast concrete, with consistent dimensions and profiles suitable for the approved fencing system.

The pales shall:

- Be of the heights specified for each site.
- Be free from major cracks, broken ends, excessive chipping and exposed reinforcement.
- Be installed at uniform spacing in accordance with the approved system.
- Be securely held in position by the horizontal crossbars and approved fastening arrangement.
- Be aligned vertically to provide a neat and uniform finish.
- Have no loose, unstable or excessively protruding components.

The nominal pale heights are as follows:

- Multipurpose (Thusong) Centre: 2.4 m.
- Grootegeluk Landfill Site: 1.8 m.
- Onverwacht Cemetery: 2.4 m.

DOWNLOADABLE

The contractor shall verify the required pale spacing and ensure that the proposed number of pales and crossbars is compatible with the post spacing and intended fencing length.

3.5 Bolts, nuts and fastening accessories

The contractor shall supply all bolts, nuts, washers and any additional fittings necessary to securely assemble the fencing system.

All fasteners shall be of suitable dimensions, strength and corrosion resistance for outdoor exposure and shall be compatible with the manufacturer's fixing arrangement.

The contractor shall:

- Supply the quantities specified in the BOQ, subject to verification of the complete system requirements.
- Ensure that bolts pass through the designated fixing points without damaging the concrete components.
- Tighten all bolts and nuts securely using suitable tools.
- Fit washers or other load-distribution accessories where required by the manufacturer's installation instructions.
- Ensure that all connections are stable and that the crossbars and pales cannot become loose during normal use.
- Replace damaged, missing or defective fasteners before the installation is presented for inspection.

Bolts shall not be overtightened to the extent that they crack, chip or otherwise damage the precast concrete components. Where the manufacturer's system requires proprietary brackets or fixing accessories, these shall be included in the quotation.

3.6 Concrete for post foundations

The contractor shall supply all concrete required for fixing and securing the precast concrete main posts.

The foundation concrete shall be suitable for the ground conditions at each site and shall be placed in properly excavated post holes. The concrete shall be proportioned and mixed to achieve a minimum compressive strength of **15 MPa at 28 days**, unless the approved design, manufacturer's instructions or the Municipal Representative requires a higher strength.

The contractor shall:

- Excavate post holes to suitable dimensions and depths based on the post design, fence height and ground conditions.
- Remove loose material and unsuitable soil from the bottom of the excavations.

DOWNLOADABLE

- Position and temporarily brace the posts to maintain the required vertical alignment and spacing.
- Place concrete around the embedded portion of each post and compact it adequately to minimise voids.
- Finish the concrete around the posts neatly, ensuring that water does not collect unnecessarily against the post.
- Protect fresh concrete from disturbance and allow sufficient curing before the fencing is subjected to loading.
- Remove surplus excavated material and concrete waste from the work area.

The size and depth of each foundation shall be appropriate for the installed post and actual ground conditions. Where the ground is loose, filled, waterlogged or otherwise unsuitable, the contractor shall notify the Municipal Representative before proceeding.

No post shall be accepted if it is unstable, out of plumb or inadequately anchored. The contractor shall include the cost of foundation excavation, concrete, mixing, placing, compaction, curing, temporary bracing and finishing in the relevant BOQ rates.

3.7 Excavation and preparation

Before excavation, the contractor shall confirm the fence alignment with the Municipal Representative and identify any underground services, drainage infrastructure, electrical cables, water pipes or other obstructions.

The contractor shall:

- Establish the approved fence line and post positions.
- Check for underground services before digging.
- Excavate post holes without unnecessarily disturbing adjacent surfaces or structures.
- Keep excavations safe and prevent unauthorised access to open holes.
- Backfill and compact disturbed areas where necessary.
- Reinstate affected surfaces to a condition acceptable to the Municipality.

Any discrepancy between the site conditions and the approved layout shall be reported before installation continues.

3.8 Installation and alignment

The contractor shall install the fencing in accordance with the approved manufacturer's installation instructions and the Municipal Representative's directions.

The installation process shall include:

DOWNLOADABLE

1. Setting out the fence line and marking the main post positions.
2. Excavating and preparing the post foundations.
3. Positioning and temporarily bracing the posts.
4. Placing foundation concrete and maintaining alignment during initial setting.
5. Installing the horizontal crossbars and vertical pales.
6. Installing and tightening all bolts, nuts and fittings.
7. Checking fence height, spacing, line, level, stability and general appearance.
8. Repairing disturbed areas and removing all construction debris.

The completed fence shall be straight, uniform and stable, with consistent pale spacing and properly secured connections. The contractor shall not leave loose components, exposed sharp fittings, unsafe excavations or incomplete sections at the end of the workday.

Installation shall be coordinated with the Municipality to minimise disruption to cemetery operations, landfill activities and public access at the Thusong Centre.

3.9 Protection of existing infrastructure

The contractor shall take reasonable precautions to protect existing buildings, roads, paved areas, graves, monuments, drainage systems, utilities, vegetation and other municipal property.

The contractor shall immediately report any damage caused by its operations and shall repair or replace the damaged property at its own cost where the damage is attributable to the contractor.

3.10 Occupational health, safety and environmental requirements

The contractor shall comply with applicable occupational health and safety legislation, municipal site rules and environmental requirements.

The contractor shall provide appropriate personal protective equipment, competent supervision, safe tools and equipment, and suitable precautions for lifting and handling heavy precast components.

At the landfill site, the contractor shall comply with all access, vehicle movement, operational safety and environmental control requirements. At the cemetery, work shall be conducted respectfully and with due regard for visitors and existing graves.

Concrete washout, broken concrete, packaging and surplus materials shall be managed responsibly. Waste shall not be dumped on municipal land or in drainage channels.

4. QUALITY CONTROL AND ACCEPTANCE

The Municipal Representative may inspect materials before installation and inspect

DOWNLOADABLE

the completed fencing at each site.

The contractor shall ensure that:

- Materials supplied match the approved specification and BOQ.
- Posts, crossbars and pales are free from unacceptable defects.
- Posts are adequately embedded and securely supported by foundation concrete.
- All bolts, nuts and associated fittings are present and properly tightened.
- The fence is aligned, stable and complete.
- Excavations and disturbed surfaces are properly reinstated.
- All construction waste is removed from the site.

The Municipality may reject damaged, defective, incorrectly sized or improperly installed components. The contractor shall replace or rectify rejected work at no additional cost where the defect arises from non-compliance with the specification or poor workmanship.

Final acceptance shall be subject to satisfactory inspection by the Municipal Representative.

5. CONTRACTOR'S RESPONSIBILITIES

The contractor shall be responsible for:

- Verifying site dimensions, post spacing and fencing configuration before ordering materials.
- Supplying and delivering all components to the three designated sites.
- Providing labour, supervision, tools, transport, lifting equipment and installation equipment.
- Supplying and placing concrete for all post foundations.
- Supplying and installing bolts, nuts, washers and necessary fittings.
- Protecting existing municipal property and maintaining safe working areas.
- Rectifying defective workmanship and replacing damaged materials attributable to the contractor.
- Removing surplus materials, packaging and construction debris.
- Submitting product details and any requested quality documentation.
- Completing the work within the approved programme and coordinating access with the Municipal Representative.

DOWNLOADABLE

All rates quoted shall include the full cost of labour, materials, delivery, offloading, installation, concrete foundations, fasteners, equipment, overheads, profit and other incidentals required to complete the work, unless a specific BOQ item states otherwise.

MBD 9

CERTIFICATE OF INDEPENDENT BID DETERMINATION

1 This Municipal Bidding Document (MBD) must form part of all bids[1] invited.

2 Section 4 (1) (b) (iii) of the Competition Act No. 89 of 1998, as amended, prohibits an agreement between, or concerted practice by, firms, or a decision by an association of firms, if it is between parties in a horizontal relationship and if it involves collusive bidding (or bid rigging).[2] Collusive bidding is a *pe se* prohibition meaning that it cannot be justified under any grounds.

3 Municipal Supply Regulation 38 (1) prescribes that a supply chain management policy must provide measures for the combating of abuse of the supply chain management system, and must enable the accounting officer, among others, to:

a. take all reasonable steps to prevent such abuse;

b. reject the bid of any bidder if that bidder or any of its directors has abused the supply chain management system of the municipality or municipal entity or has committed any improper conduct in relation to such system; and

c. cancel a contract awarded to a person if the person committed any corrupt or fraudulent act during the bidding process or the execution of the contract.

4 This MBD serves as a certificate of declaration that would be used by institutions to ensure that, when bids are considered, reasonable steps are taken to prevent any form of bid-rigging.

5 In order to give effect to the above, the attached Certificate of Bid Determination (MBD 9) must be completed and submitted with the bid:

[1] Includes price quotations, advertised competitive bids, limited bids and proposals.

[2] Bid rigging (or collusive bidding) occurs when businesses, that would otherwise be expected to compete, secretly conspire to raise prices or lower the quality of goods and / or services for purchasers who wish to acquire goods and / or services through a bidding process. Bid rigging is, therefore, an agreement between competitors not to compete.

1 Joint venture or Consortium means an association of persons for the purpose of combining their expertise, property, capital, efforts, skill and knowledge in an activity for the execution of a contract.
